Dear Diary,

I had such a cool day today. I went on the river. We saw some famous sights from the boat, like the Louvre, a beautiful museum with fantastic paintings, and the Eiffel Tower. The Eiffel Tower is really tall and made of metal. I tried to speak French, but I couldn't really say anything. But the French people were very kind and when I spoke English, they understood me! At the end of the day we went to a French restaurant and had a wonderful meal with potatoes. It was a special day.

It only took an hour to reach our destination. When we arrived, we had the chance to wander through the streets and several people bought traditional Jordanian handicrafts from the stalls. I bought a lovely colorful rug. That was lucky because I spent hours in the museum !

Unusual homes

Hi! My name's Dalida and I like blogging about different things. This week I'm writing about unusual homes. This topic is very interesting for me because my mom's an architect, so she sometimes takes me to see some brilliant places. It's really awesome!

I found this unusual house in the Netherlands online - it's upside down! It is actually an old farmhouse which people are changing to make it modern. This works very well because all the windows are at the top, so you get a lot of light. Local people like it because it fits in very well with the local landscape, which is farms and fields. It is also very ecological because they use air, water, and sun to heat and make energy for the house. That's so cool! 🙂

What do you think of it? Do you like it?

WRITING TIME

"My new apartment"

more modern – bigger television

I moved into a new apartment with my family. The new kitchen is bigger and the oven is more modern. There is more space in the living room so we can have a bigger television. We have three bedrooms now. There are two bathrooms and a fantastic balcony.

"My bedroom"

On the right – armchair

I love my bedroom. On the right, there is my bed with a desk next to it. In the middle of the room, there is an armchair with two cushions and a big closet. On the wall, there are lots of posters of animals.

"Ancient Egyptian homes"

reed mats – storing crops

The furniture in Ancient Egyptian homes was very different from today. There were reed mats to sit and sleep on. Ancient Egyptians used papyrus to cover the windows and doors. In every home, there were large pots and baskets for storing crops and wooden boxes for clothes.

"An unusual home"

- Where is it?
- Why is it unusual?

The upside down house is in the Netherlands. It is actually an old farmhouse. All the windows are at the top, so you get a lot of light. It is also very ecological because they use air, water, and sun to heat and make energy for the house. That's so cool!

“Day at the club”

five people – football practice

Only five people came to the club last night. Some of them weren’t feeling well. Adel hurt his ankle at a football practice last night. Doha had an earache from swimming. I have a backache, too.

Do you like living here?- It's much bigger than our old apartment.- How long did you live in your old apartment?-

Ancient Egyptian homes: Many people made their homes near the Nile. They used water from the Nile for drinking.

They used mud from the river to make bricks.

The mud bricks helped them to keep their homes cool. Some people painted their homes white to make them cooler. The flat roofs were the coolest part of the house. The furniture was very different from today. There were reed mats to sit and sleep on. They used papyrus to cover the windows and doors. This kept the insects outside. They stored their crops in large pots and baskets. They stored their clothes in wooden boxes. Not many people had beds or chairs. In the countryside, houses had one floor. In cities, houses had two floors to save space.

Unusual Homes

There is an unusual house in the Netherlands. It is upside down! It is an old farmhouse. The windows are at the top, so you get lots of light. Local people like it because it fits well with the landscape, which is farms and fields. It is very ecological because it uses renewable energy. That is so cool! I'd like to live in a house like this.
